

Total Care Physiotherapy Consulting Group

Private Physiotherapy Service for High Level Care Residents - Information Page

About us

Total Care Physiotherapy Consulting Group is a group of physiotherapists of whom are available to provide a variety of services to the Aged Care Facilities. These physiotherapists have specialties in aged care treatment and rehabilitation and may be able to visit and treat residents of aged care facilities at the aged care facility.

What is Private Physiotherapy?

Private Physiotherapy is defined as the type of treatment provided **directly** by a physiotherapist to the patient with the goal of **improving** a persons physical condition in the long term. You have most likely been provided this information as you or someone you know within the aged care facility has requested or requires physiotherapy which is not provided by the Aged Care Facility.

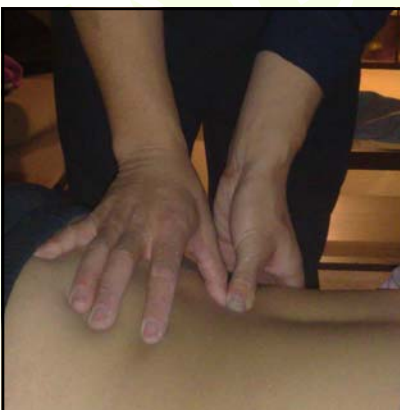

What is a Consulting Physiotherapist & how is that different?

A Consultant Physiotherapist is a Physiotherapist contracted by the Aged Care Facility to screen residents for maintenance physiotherapy & exercise needs. There is no direct fee to the residents for a Physiotherapy Consultants' services. However, the Physiotherapy Consultant's role has limits, one being the inability to provide direct treatment to the residents.

Is Private Physiotherapy for me?

Situations may arise whereby the role of a Consulting Physiotherapist may not be sufficient to meet the exercise needs of a resident. The Consultant Physiotherapist can help you decide if Private Physiotherapy may be right for you.

How do I arrange a Private Physio?

The consulting physiotherapist can send a referral to TCPCG's head office who will seek a private physiotherapist in your area and confirm their availability. If we are not able to find a Private Physiotherapist to come to your area, you will be contacted and advise of this.

Where can I get more information?

If you have any further questions, please speak to the Consulting Physiotherapist.
